

Design Your Future

Fast track your career in the rapidly growing semiconductor sector by joining the Sondrel IC design training course. This intensive three month program is the first of its kind in China, created by Sondrel, EDA tool supplier Mentor Graphics and the University of Nottingham, to teach you the design skills, using the latest techniques and software tools, which will prepare you for a career in the industry. All the training courses, based at the beautiful University of Nottingham's Ningbo campus in China, comprise 400 hours of supervised tuition, and are delivered by international academics and experienced engineers.

Benefits to Students

A career in IC design will be a rewarding one. Sondrel, a world leading design services company, can help you to make the best possible start to your own career path.

- An excellent way to transfer from university to industry
- Forge a career in a fast growing industry in China, and worldwide
- Study leading edge design techniques using the latest tools
- Professional lecturers with industry experience
- An opportunity to progress to an internship on completion of the course

Key Course Facts

- This is a 3 month training program
- Based in Ningbo, China
- A bilingual course
- Scholarships available
- Internships offered on successful completion of the course
- Courses running in June and September 2015
- Qualifying trainees will receive a Training Certificate issued by The University of Nottingham, and an EDA application certificate

Sondrel – a World Leading IC Design Consultancy

Sondrel is headquartered in the United Kingdom and has offices in China (Shanghai & Xi'an), USA, France, Israel and Germany. The CEO, Graham Curren, is a director of the China British Business Council, promoting industry partnerships between China and the UK.

Working for world leading semiconductor companies, and with a reputation for completing complex, challenging and leading edge designs, Sondrel continues to grow and invest in its recruitment program. This year, Sondrel is opening a new state of the art design center in Xi'an, to accommodate the growing business in China.

Sondrel believe in investing in talented employees that are able to work across our worldwide locations. We have special employee schemes set up to support and reward our employees.

What the Students Say

'The training programme provided me with an impressive journey last summer... it allowed me to realise the difference between real work in a company and university life.'

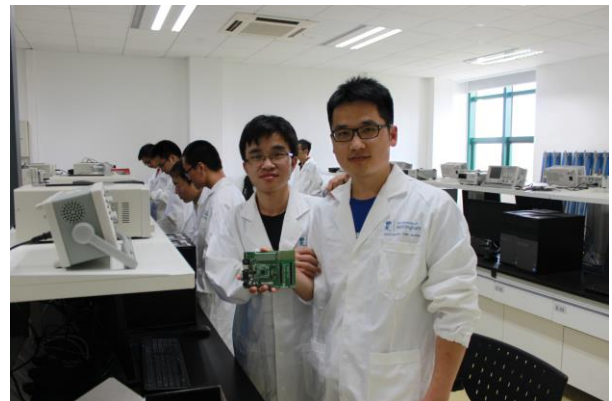

Zhu (1st Cohort Trainee, now undertaking a Masters programme at Imperial College)

'This professional training has rapidly developed my skills. The teachers here have practical engineering experience and have exposed me to the latest knowledge. Not only did I get a good job at the end of the course, but I'm also able to work on projects for world-class companies like AMD.'

Liu (Graduate of Fudan University, now working in AMD)

'With practical skills and real-environment working experience, the training school provided a new environment in design which I never experienced at university. It is a great starting point for my career.'

Shen (UNNC undergraduate, now working at Sondrel)
